## PUBLICATIONS OF THE DIVISION OF FOREIGN MARKETS.

### BULLETINS.

[To be procured, at the prices indicated, from the Superintendent of Documents, Government Printing Office, Washington, D. C.]

- No. 1.—Great Britain and Ireland. Price (including supplement), 10 cents.
- No. 2.—The German Empire. Price, 5 cents.
- No. 3.—France. Price, 5 cents.
- No. 4.—Canada. Price, 5 cents.
- No. 5.—Netherlands. Price, 5 cents.
- No. 6.—Belgium. Price, 5 cents.
- No. 7.—Norway. Price, 5 cents.
- No. 8.—Sweden. Price, 5 cents.
- No. 9.—Trade of Denmark. Price, 5 cents.
- No. 10.—Our Foreign Trade in Agricultural Products during the Five Fiscal Years 1893-1897. Price, 5 cents.
- No. 11.—Spain's Foreign Trade. Price, 5 cents.
- No. 12.—Our Trade with Spain, 1888-1897. Price, 5 cents.
- No. 13.—Trade of Puerto Rico. Price, 5 cents.
- No. 14.—Trade of the Philippine Islands. Price, 10 cents.
- No. 15.—Our Foreign Trade in Agricultural Products, 1894-1898. Price, 5 cents.
- No. 16.—Distribution of the Agricultural Exports of the United States, 1894-1898. Price, 10 cents.
- No. 17.—Sources of the Agricultural Imports of the United States, 1894-1898. Price, 10 cents.
- No. 18.—Our Trade with Japan, China, and Hongkong, 1889-1899. Price, 10 cents.
- No. 19.—Our Foreign Trade in Agricultural Products, 1890-1899. Price, 5 cents.
- No. 20.—Agricultural Exports of the United States, by Countries, 1895-1899. Price, 10 cents.
- No. 21.—Agricultural Imports of the United States, by Countries, 1895-1899. Price, 5 cents.
- No. 22.—Our Trade with Scandinavia, 1890-1900. Price, 10 cents.
- No. 23.—Our Foreign Trade in Agricultural Products, 1891-1900. Price, 5 cents.
- No. 24.—Sources of the Agricultural Imports of the United States, 1896-1900. Price, 10 cents.
- No. 25.—Distribution of the Agricultural Exports of the United States, 1896-1900. Price, 10 cents.
- No. 26.—Agricultural Imports of the United Kingdom, 1896-1900. Price, 15 cents.
- No. 27.—Our Foreign Trade in Agricultural Products, 1892-1901. Price, 5 cents.
- No. 28.—Sources of the Agricultural Imports of the United States, 1897-1901. Price, 10 cents.
- No. 29.—Distribution of the Agricultural Exports of the United States, 1897-1901. Price, 10 cents.
- No. 30.—Agricultural Imports of Germany, 1897-1901. Price, 20 cents.
- No. 31.—Sources of the Agricultural Imports of the United States, 1898-1902. Price, 10 cents.
- No. 32.—Distribution of the Agricultural Exports of the United States, 1898-1902. Price, 15 cents.
- No. 33.—Foreign Trade of the United States in Forest Products, 1902. Price, 5 cents.
- No. 34.—Agricultural Exports of the United States, 1851-1902. Price, 10 cents.
- No. 35.—Foreign Import Tariffs on Meat and Meat Products, 1903. Price, 5 cents.
- No. 36.—Foreign Import Tariffs on Fruits and Nuts, 1903. Price, 5 cents.
- No. 37.—Foreign Import Tariffs on Grain and Grain Products, 1903. Price, 5 cents.

### CIRCULARS.

[For free distribution; apply to the Secretary of Agriculture, Washington, D. C.]

- No. 1.—Peaches and Other Fruits in England. (Exhausted.)
- No. 2.—American Dried Apples in the German Empire.
- No. 3.—Imports and Exports for 1893 and 1894. (Exhausted.)
- No. 4.—An Example for American Farmers and Dairymen. (Exhausted.)
- No. 5.—The Treaty of Shimonoseki between China and Japan of April 17, 1895, and Our Possibilities of Trade with those Countries. (Exhausted.)
- No. 6.—Imports and Exports for 1893, 1894, and 1895. (Exhausted.)
- No. 7.—Extension of Markets for American Feed Stuffs.
- No. 8.—The Manchester District of England as a Market for American Products.
- No. 9.—Imports and Exports for 1893, 1894, 1895, and 1896. (Exhausted.)
- No. 10.—Course of Wheat Production and Exportation in the United States, Canada, Argentina, Uruguay, Russia, and British India from 1880 to 1896.
- No. 11.—Agricultural Products Imported and Exported by the United States in the Years Ended June 30, 1892 to 1896, Inclusive. (Exhausted.)
- No. 12.—Sources of the Principal Agricultural Imports of the United States during the Five Years Ended June 30, 1896. (Exhausted.)
- No. 13.—Distribution of the Principal Agricultural Exports of the United States during the Five Years Ended June 30, 1896. (Exhausted.)
- No. 14.—Hamburg as a Market for American Products.
- No. 15.—Exports of Cotton from Egypt.
- No. 16.—Our Trade with Cuba from 1887 to 1897.
- No. 17.—United States Wheat for Eastern Asia.
- No. 18.—Hawaiian Commerce from 1887 to 1897.
- No. 19.—Austria-Hungary as a Factor in the World's Grain Trade; Recent Use of American Wheat in that Country.
- No. 20.—Agricultural Imports and Exports, 1893-1897.
- No. 21.—Agricultural Imports and Exports, 1894-1898.
- No. 22.—Agricultural Imports and Exports, 1895-1899.
- No. 23.—Agricultural Imports and Exports, 1896-1900.
- No. 24.—Agricultural Imports and Exports, 1897-1901.
- No. 25.—Our Foreign Trade in Agricultural Products, 1902.

## LETTER OF TRANSMITTAL.

---

UNITED STATES DEPARTMENT OF AGRICULTURE,

BUREAU OF STATISTICS,

*Washington, D. C., July 21, 1905.*

SIR: I have the honor to transmit herewith a compilation of statistics of the imports of farm and forest products for the year ending June 30, 1904, with those for two previous years given for comparison. The data have been derived from the Bureau of Statistics of the Department of Commerce and Labor, the work having been done by the Division of Foreign Markets, under the direction of its chief, George K. Holmes.

This report is intended as a continuation of a series of bulletins on the same subject designed for the use of this Department and to meet the demands of a large number of correspondents, since they contain an arrangement of the statistics and a determination of totals, with various comparisons, that are not presented in any other publication.

It is respectfully recommended that this report be published as Bulletin No. 35 of this Bureau.

Very respectfully,

W. M. HAYS,

*Assistant Secretary, in Charge.*

Hon. JAMES WILSON,

*Secretary of Agriculture.*

## EXPLANATION OF TERMS.

**IMPORTS.**—Goods from a foreign country entered at a custom-house.

**IMPORTS FOR CONSUMPTION.**—Goods which have passed from the control of customs officers into domestic trade in this country.

**FOREIGN EXPORTS OR REEXPORTS.**—Goods which have been imported into this country, either for reexport or for consumption, and are afterwards exported, having "undergone no change in form or condition or enhancement in value by the application of labor in the United States."

**DOMESTIC EXPORTS.**—Goods produced or manufactured in this country from either domestic or imported raw materials, and which are shipped to foreign countries.

**TRANSIT OR IN TRANSIT TRADE.**—Goods from a foreign country passing through the United States on the way to the same or another foreign country.

**TRANSSHIPMENT TRADE.**—Goods from a foreign country received at a United States port and there reshipped to a foreign country without being entered as an import into this country.

In transit and transshipment trade is not included in the imports and exports of the United States, but is reported separately.

**THE COUNTRY OF CONSIGNMENT** is that which is mentioned in the exporting or importing documents as the one from which or to which the merchandise is to be shipped. The regulations of the Bureau of Statistics, Department of Commerce and Labor, are:

Collectors will consider the country in which merchandise was invoiced as the country whence the same was imported into the United States.

In export statements the countries stated should be, so far as can be ascertained, those for which the exports are destined for a market. \* \* \* Exporters will be required to state in their manifests of goods exported the country of ultimate destination.

The country from which or to which goods are consigned may or may not be the country of origin or ultimate destination, as the case may be; the foregoing regulation with regard to the country of ultimate destination in export statements does not result in a material representation of countries of ultimate destination in place of countries of consignment in the records of the exports of this country, when these two countries are not the same.

**VALUES.**—The values of imported articles subject to *ad valorem* duties are defined by the act of Congress of June 10, 1890, as—

The actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

The value of all other imports, whether subject to specific duty or free of duty, is also determined according to the law just quoted.

*The value of domestic exports* is their value at the time of exportation in the ports of the United States whence they are exported.

*The value of foreign exports* when shipped directly from bonded warehouses (usually dutiable goods) is their import value, but when not shipped from bonded warehouses (usually free goods) the value is determined in the same manner as for domestic exports.

*Goods in transit* through the United States from one foreign country to another are valued in the same manner as imports.

*Valuation deceptions*.—The value of imported articles subject to *ad valorem* duties is believed to be determined with more accuracy, according to the legal method of valuation, than other imports (whether subject to specific duties or free) and exports; the valuations of dutiable imports and of exports dutiable in foreign countries tend to understatement, and the valuations of imports that are free of duty are liable to inflation for the purpose of trade deception.

**WEIGHTS.**—In the official trade returns of the United States, the weights of all articles exported are net weights, and also the weights of all imports, except those which are subject to a specific duty levied upon the weight of the packages, including the weight of the article itself, together with some or all of its coverings. All tons mentioned in this bulletin, except where it is otherwise stated, are long tons of 2,240 pounds.

**DISCREPANCIES IN FOREIGN TRADE STATISTICS** of various countries are partly due to different methods of estimating values, of determining countries of origin and destination, and of classifying merchandise, and to differences in dates. The United States does not include c. i. f. charges (cost, insurance, freight) in the value of either exports or imports (except some foreign exports), while the United Kingdom, for instance, includes these in the value of its imports. It is said that these charges are often erroneously included by British shippers in their statement of export values, especially when the selling price includes cost of delivery.

The United States trade returns include the free zones of Hamburg, Bremen, and Lübeck in Germany, while the statistics of the German Empire do not.

In consequence of various sources of discrepancy, it is generally futile to undertake to balance an export of this country by any official statement of import into a foreign country, and often there is not an approximate agreement.

**NONCONTIGUOUS POSSESSIONS.**—The “noncontiguous” possessions of the United States are all those not included between Canada on the north and Mexico and the Gulf of Mexico on the south, and between the Atlantic and the Pacific oceans.

The trade returns of all the possessions of this country, except the Philippine Islands, are included in the total trade of the United States. In the trade statistics for any noncontiguous possession, all other noncontiguous possessions, except the Philippine Islands, are included with the United States; thus, shipments from Hawaii to Guam are included in the total shipments from Hawaii to the United States.

# IMPORTS OF FARM AND FOREST PRODUCTS, 1902-1904.

## GENERAL SURVEY.

### IMPORTS OF FARM PRODUCTS FOR FIFTEEN YEARS.

The value of farm products imported during the fiscal year 1904 was the largest in fifteen years: It was \$5,000,000 more than in 1903 and \$54,000,000 above the annual average for 1899 to 1903. The value of farm products imported during the year ending June 30, 1904, was less than one-tenth of the estimated value of the products of the farms of the United States during the calendar year 1903. The total value of products of farms of this country, not fed to live stock, for the calendar year 1903 was estimated at \$4,480,000,000 in the Report of the Secretary of Agriculture for the fiscal year 1904. A noticeable feature in the imports of farm products during the last fifteen years is the absence of any general tendency toward an increase. There were increases in individual years, such as occurred in 1904, but the per capita value of farm products imported into the United States has actually decreased from an annual average of \$6.46 for the period 1890-1893 to \$5.26 for the period 1899-1903. The high total value of farm-product imports in 1904 raised the per capita value to only \$5.64. The total value of all farm products imported into the United States for fifteen years was \$6,000,000,000.

Table 1 shows the value of imports of all merchandise and also of imports of farm products for each of the fifteen years ending with 1904.

TABLE 1.—*Value of IMPORTS of FARM products, 1890-1904, and comparison with total imports.*

Year ending June 30—	Imports.			
	Total.	Farm products.	Other than farm products.	Per cent of farm products of total.
1890 . . . . .	\$789,310,409	\$384,100,435	\$405,209,974	48.7
1891 . . . . .	844,916,196	420,211,949	424,704,247	49.7
1892 . . . . .	827,402,462	436,697,057	390,705,405	52.8
1893 . . . . .	866,400,922	425,657,448	440,743,474	49.1
Annual average, 1890-1893 . . . . .	832,007,497	416,666,722	415,340,775	50.1
1894 . . . . .	654,994,622	365,160,319	289,834,303	55.8
1895 . . . . .	731,969,965	373,115,985	358,853,980	51.0
1896 . . . . .	779,724,674	391,029,407	388,695,267	50.1
1897 . . . . .	764,730,412	400,871,468	363,858,944	52.4
1898 . . . . .	616,049,654	314,291,796	301,757,858	51.0
Annual average, 1894-1898 . . . . .	709,493,865	368,893,795	340,600,070	52.0
1899 . . . . .	697,148,489	355,514,881	341,633,608	51.0
1900 . . . . .	849,941,184	420,139,288	429,801,896	49.4
1901 . . . . .	823,172,165	391,931,051	431,241,114	47.6
1902 . . . . .	903,320,948	413,744,557	489,576,391	45.8
1903 . . . . .	1,025,719,237	456,199,325	539,519,912	44.5

1904 . . . . .	991,087,371	461,434,851	529,652,520	46.6
Total 15 years, 1890-1904 . . . . .	12,165,888,710	6,010,099,817	6,155,788,893	49.4

## IMPORTS OF FOREST PRODUCTS FOR ELEVEN YEARS.

The great increase in the value of forest products imported in 1903, as shown in Table 2, was followed the next year by another large increase, so that the value in 1904 was \$20,000,000 greater than in 1902, and \$8,000,000 greater than in 1903. The imports of forest products exceeded the domestic exports by \$9,600,000. The total value of forest products imported during the eleven years ending with 1904 was \$600,000,000, or about two-thirds the farm value of the corn crop harvested in the United States in 1903.

TABLE 2.—*Value of IMPORTS of FOREST products, 1894-1904.*

Year ending June 30—	Value.	Year ending June 30—	Value.
1894 .....	\$39,683,781	1899.....	\$53,314,266

		1904.....	79,619,296
		Total, 11 years.....	600,601,001

## BY GRAND DIVISIONS.

According to Table 3 the value of farm products imported from countries of North and South America into the United States increased \$17,000,000 from 1903 to 1904, while the value of farm products imported from Europe, Asia, Oceania, and Africa declined \$12,000,000, leaving a net gain in imports of farm products of \$5,000,000 in 1904 over 1903. South America ranked fourth in the value of farm products consigned to the United States in 1903 and 1904, and ranked second in 1902. Africa ranked sixth in 1903 and 1904 and fifth in 1902. During all three years Europe ranked first.

In the value of forest products consigned to the United States in 1904 South America ranked first, while in 1903 it ranked third. The value of forest products imported from South America increased \$8,000,000 from 1902 to 1904. North America, which ranked first in the value of forest products consigned to the United States in 1902 and 1903, was reduced to the third place in 1904. The forest products imported from Africa are rather insignificant in value, the total value for all three years, 1902-1904, being only about \$800,000.

TABLE 3.—*Value of IMPORTS of FARM and FOREST products, 1902-1904, by grand divisions.*

**IMPORTANT COUNTRIES CONSIGNING FARM PRODUCTS.****CHANGES IN AMOUNTS.**

Of the \$461,000,000 worth of farm products imported in 1904 more than \$286,000,000 came from eight countries—Cuba, Brazil, United Kingdom, Japan, Chinese Empire, Mexico, Italy, and France. In 1903 Italy ranked fifth in value of imports received by the United States, and in 1904 seventh. The Chinese Empire, which in 1903 ranked seventh, the following year took Italy's former place as fifth. Similarly Mexico rose during 1904 from eighth to sixth place, and France declined from sixth to eighth place. Table 4 shows that Cuba, Brazil, United Kingdom, and Japan contributed in 1904 the same relative values of farm products as in 1903. During 1904 there were 40 countries each of which consigned at least \$1,000,000 worth of farm products to the United States, and 12 countries each of which consigned at least \$10,000,000 worth.

Some marked declines in the value of farm products imported took place from 1902 to 1904. The British West Indies consigned \$12,000,000 in 1902 and only \$7,000,000 in 1904; Dutch East Indies \$14,000,000 in 1902 and \$10,000,000 in 1904; Brazil \$62,000,000 in 1902 and \$53,000,000 in 1904, and Germany \$19,000,000 in 1902 and \$15,000,000 two years later.

The greatest increase was in the Cuban trade. Imports of farm products from Cuba in 1902 were valued at \$29,000,000, and two years later at \$71,000,000. Japan increased from \$26,000,000 in 1902 to \$34,000,000 in 1904, and European Russia from \$6,000,000 in 1902 to \$10,000,000 in 1904.

TABLE 4.—*Value of IMPORTS of FARM products, 1902-1904, by countries from which consigned.*

**CUBA.**

During the fiscal year 1904 Cuba held the place of first importance among the countries from which farm products were consigned to the United States. The value of farm products imported from Cuba in this year was \$71,000,000, which was \$18,000,000 more than the value of farm products imported from any other country.

The outbreak of the Cuban revolution on February 20, 1895, was followed by a decline in the foreign trade of the island. Imports of sugar into the United States from Cuba declined from \$64,000,000 in 1894 to \$41,000,000 in 1895, and in 1898 the value was as low as \$10,000,000. After the close of the Spanish-American war in 1899 the trade of the island began to revive, and imports of sugar from Cuba into the United States increased until the value reached \$57,000,000 in 1904, an increase of \$13,000,000 over 1903 and \$38,000,000 over 1902. Imports of other farm products from Cuba increased also during the same time. Table 5 gives the average annual value of leading farm products imported into the United States from Cuba for the sixteen years ending with 1904.

TABLE 5.—*Value of farm products imported from Cuba, 1889-1904.*

Year ending June 30—	Sugar and molasses.	Tobacco.	Other farm products.	Total.
Average, 1889-1893 .....	\$49,987,009	\$7,372,262	\$2,446,217	\$59,805,488
Average, 1894-1898 .....	30,260,491	5,780,711	1,362,030	37,403,232
Average, 1899-1903 .....	25,150,589	8,192,196	1,358,575	34,701,360
1904 .....	57,421,746	9,793,672	3,504,472	70,719,890

In 1904 the fruits imported from Cuba were valued at \$2,255,977.

**BRAZIL.**

The leading article imported from Brazil is coffee. During the five years 1894-1898 the average annual imports of coffee were 483,000,000 pounds; during the next five years the average annual imports were 703,000,000 pounds, and in 1904 742,000,000 pounds of coffee were

imported from Brazil. Most of this coffee is shipped from the ports of Santos and Rio de Janeiro. It is said that the State of São Paulo, in which the port of Santos is located, produces one-half of the coffee crop of the world.

An item of considerable importance in the list of farm products imported from Brazil is hides and skins. Most of these are shipped from Pernambuco, Ceara, and Bahia. The quantity of hides and skins imported from Brazil in 1899 was 13,000,000 pounds; in 1902, 7,000,000 pounds, and in 1904, 6,000,000 pounds.

Crude cocoa, valued at \$1,000,000, was the third item of importance among the farm products imported from Brazil in 1904. Most of this cocoa was shipped from the port of Para. Coffee, hides and skins, and cocoa together equaled \$52,000,000, or all but about \$1,000,000 of the total farm products imported from Brazil in 1904.

Brazil nuts, sugar, seeds, and hair constituted nearly all the remaining farm products imported from Brazil in 1904. The sugar was shipped chiefly from Pernambuco and the nuts from Para.

Of the \$76,000,000 worth of all merchandise imported into the United States from Brazil in 1904, \$66,000,000 was entered at New York; less than \$9,000,000 at New Orleans, and about \$1,600,000 at Baltimore. The imports from Brazil into other United States customs districts were small.

#### UNITED KINGDOM.

The United Kingdom was third in importance among the countries from which farm products were consigned to the United States during the three years ending June 30, 1904. In 1902 8.74 per cent of the value of farm products imported came from the United Kingdom, and in the following year the percentage was 7.91, while in 1904 it had declined to 7.45 per cent.

During the fiscal years 1902-1904, the total value of imports of farm products from the United Kingdom was \$106,604,007, while the exports of domestic farm products to the same country were valued at \$1,213,422,435.

The items mentioned by name in Table 6, amounting in all to \$26,000,000, made 76 per cent of the value of farm products imported from the United Kingdom during the fiscal year 1904.

TABLE 6.—*Leading farm products imported from the United Kingdom, 1904.*

Article.	Per cent.	Article.	Percent.
Wool.....	27.2	Vegetable oils.....	6.2
Hides and skins other than furs.....	14.1	Feathers and down, crude.....	6.1
Alcoholic liquors.....	11.2	Tea.....	4.0
Vegetable fibers.....	7.2	Other farm products.....	24.0
		Total.....	100.0

The farm products imported from the United Kingdom in 1904 included every article except corn, rye, broom corn, raw chicory root, egg yolks, istle (or Tampico fiber), bananas, lemons, plums and prunes, hay, subtropical fruit plants for propagation, silk cocoons, and raw sugar. All other articles classed in this bulletin as farm products were represented in the list of imports from the United Kingdom in 1904.

#### RUSSIA.

The value of farm products imported from European Russia during 1904 was the largest in eleven years, and was more than double the value for 1901. The leading farm products received from Russia during the period 1894-1904 were hides and skins other than furs, and wool. Table 7 shows the increase in both these items and in the total value of farm products imported from European Russia.

TABLE 7.—*Value of farm products imported from European Russia, 1894-1904.*

Year ending June 30—	Hides and skins.	Wool.	Other farm products.	Total.
Average, 1894-1898 .....	\$706,368	\$1,269,132	\$546,963	\$2,522,463
Average, 1899-1903 .....	2,606,116	1,609,889	1,200,061	5,416,066
1904 .....	5,425,826	3,041,724	1,606,728	10,074,278

During 1904 all the wool imported from European Russia belonged to "Class 3," or carpet wool, and the hides and skins imported belonged to the general item known as "other hides and skins," which includes the skins of sheep, horses, and calves.

The imports of farm products from Asiatic Russia amounted to only \$29,628 for the three years 1902-1904. In 1902 the items were goat-skins, sausage casings, and wool, worth altogether \$21,049. The following year \$119 worth of meat, meat extracts, and nuts comprised all the farm products imported from this part of Russia, while in 1904 the farm products imported were seeds and wool, valued at \$8,460.

There were no imports of farm products from Russian China during 1902-1904, and no imports of any kind from this region in 1902 and 1903. Russian China included Port Arthur and Talienshan (Dalny).

#### JAPAN.

The value of farm products imported from Japan during the fiscal year 1904 was \$2,000,000 more than in 1903 and \$8,000,000 greater than in 1902. The increase in 1904 over 1903 was due almost wholly to larger imports of tea, while the increase in 1904 over 1902 was due to both tea and silk, each article gaining \$4,000,000. Besides these two leading articles, other important farm products consigned from Japan in 1904 were rice, wines, and pickles and sauces, valued altogether at \$1,000,000. More than 50 articles, whose total value was \$600,000, made up the rest of the farm products imported from Japan during 1904.

The relative importance of tea and silk, and the increase in their value during the fifteen years ended June 30, 1904, are shown in Table 8.

TABLE 8.—*Value of farm products imported from Japan, 1889-1904.*

Year ending June 30—	Raw silk.	Tea.	Other farm products.	Total.
Average, 1889-1893 .....	\$11,979,083	\$5,160,768	\$483,347	\$17,623,148
Average, 1894-1898 .....	11,616,085	4,742,652	534,049	16,892,736
Average, 1899-1903 .....	18,962,640	4,739,437	1,101,731	24,803,808
1904 .....	24,424,167	7,865,573	1,608,931	33,893,671

The ten calendar years just preceding the outbreak of the Russo-Japanese war were marked in Japan by an increased production of silk and a decline in the production of tea. The average annual production of raw silk in Japan increased from 12,000,000 pounds during 1894-1898 to 15,000,000 pounds during 1899-1903, while the average annual crops of tea declined from 69,000,000 pounds to 59,000,000 pounds in the same time.

The average annual exports of raw silk and tea from Japan to all countries for the same five-year periods are expressed in Table 9:<sup>a</sup>

TABLE 9.—*Average quantity, value, and export price of silk and tea annually exported from Japan, 1894-1903.*

Article.	Quantity.	Value.	Average export price per pound.
	Pounds.	Dollars.	Dollars.
Raw silk:			
1894-1898.....	7,135,113	21,287,297	2.98
1899-1903.....	9,171,898	33,190,750	3.62
Tea:			
1894-1898.....	45,762,918	3,910,095	0.09
1899-1903.....	44,751,902	5,060,497	0.11

The increase in the price of tea caused the exports in 1899-1903 to be worth more than in 1894-1898, in spite of the slightly diminished quantity during the later period.

#### CANADA.

Although the value of farm products consigned to the United States from Canada in 1904 reached almost \$10,000,000, no single item was valued at as much as \$1,000,000. The most valuable article (cattle hides) amounted to \$918,000; hay was worth \$914,000, and potatoes \$810,000. Other valuable farm-product imports were horses, sheep, wheat flour, distilled spirits, refined sugar, tea, unmanufactured tobacco, beans and dried pease, cotton, flax, silk, and wool.

<sup>a</sup> Compiled from tables in the Twentieth Statistical Report of the Department of Agriculture and Commerce of Japan, 1905.

**MEXICO.**

Of the farm products imported from Mexico in 1904 five were worth at least \$1,000,000 each, the most valuable of which—sisal grass—was valued at \$16,000,000. Next in importance was coffee, and third in value were goatskins. The value of each of these two items was about \$2,000,000. Vanilla beans and istle (or Tampico fiber) were valued at \$1,000,000 each.

Among the other farm products of importance received from Mexico were cattle, beeswax, oranges, cattle hides, spices, and beans and dried pease.

**VENEZUELA, COLOMBIA, AND PANAMA.**

Of the \$6,000,000 worth of farm products imported from Venezuela in 1903, \$5,000,000 was due to coffee. The next important item, cattle hides, together with goatskins, other hides and skins, and crude cocoa, made up nearly all the remaining value of the farm products imported from that country.

The imports of farm products from Colombia in 1904 were similar to those from Venezuela. The leading item was coffee, valued at \$5,000,000. Other items of importance were hides and skins, bananas, cocoanuts, tobacco, and crude cocoa.

The imports from Panama are given for the last six months of the fiscal year 1904. Prior to that time Panama was included with Colombia. The leading farm products imported from Panama in 1904, in order of the magnitude of their value, were bananas, hides and skins, cocoanuts, coffee, oranges, and crude cocoa. The total value of farm products amounted to \$318,000. Bananas alone were worth \$264,000.

**BRITISH WEST INDIES AND SANTO DOMINGO.**

The most valuable farm product imported from British West Indies in 1904 was crude cocoa, valued at about \$3,000,000. This, together with bananas and raw sugar, made a total of \$5,000,000. Oranges, cocoanuts, and spices together amounted to about \$1,000,000.

The chief products of the farm consigned from Santo Domingo to the United States in 1904 were raw sugar, valued at \$1,750,000; crude cocoa, \$598,000; and bananas, \$299,000.

Besides these leading articles other farm products imported from Santo Domingo were coffee, goatskins, cattle hides, beeswax, and honey.

**IMPORTANT COUNTRIES CONSIGNING FOREST PRODUCTS.****BRAZIL AND CANADA.**

The two leading countries from which forest products were consigned to the United States during the three years ending with 1904, as shown in Table 10, were Brazil and Canada. Only eleven countries in 1904 consigned forest products worth as much as \$1,000,000. A

large consignment was received from British Australasia in 1904, causing that country to rank 11th among those from which forest products were consigned; in 1903 it ranked 38th.

Practically all of the value of forest products imported from Brazil during the three years ending with 1904 consisted of India rubber. Most of the India rubber imported into the United States is consigned directly from Brazil, but a considerable quantity of Brazilian rubber reaches the United States by way of European ports. The value of the India rubber imported from Brazil in 1904 was equal to about one-half of the value of the coffee imported and less than one-third of the total merchandise imported from Brazil.

The forest products of Canada imported into the United States consisted chiefly of lumber, timber, and wood pulp. The forest products imported from Canada in 1904 formed 33 per cent of the total value of merchandise imported from that country and exceeded the imports of farm products from Canada by \$7,000,000. A more detailed discussion of the lumber imports will be found under the title "Lumber," page 25.

#### BRITISH EAST INDIES.

In 1904, for the first time, separate returns were made in the United States statistics for three divisions of the British East Indies: British India, the Straits Settlements, and the rest of the group. Gums make up the principal part of forest products imported from the British East Indies. From British India were consigned 8,000,000 pounds out of the 11,000,000 pounds of shellac imported from all sources, and the Straits Settlements supplied nearly all of the gambier or terra japonica imported this year. Besides this gum, the Straits Settlements also consigned to the United States in 1904, gutta joolatong, or East Indian gum, India rubber, copal, cowrie, dammar, gutta percha, and unmanufactured wood.

#### BELGIUM AND PORTUGAL.

Belgium consigned to the United States in 1904 over \$5,000,000 worth of India rubber. This item included all but about \$30,000 of the value of forest products consigned from Belgium to the United States that year. Most of this rubber came to Belgium from the Congo Free State.

Portugal consigned more than \$2,000,000 worth of India rubber to the United States in the same year, and about \$1,000,000 worth of other forest products.

The consignment of tropical products from Belgium and Portugal is by no means an unusual occurrence in international trade. It will be seen from an examination of the tables of this bulletin that from the countries of Europe engaging in the world's commerce are consigned to the United States large quantities of products which can be produced only in climates other than those from which the goods were shipped to the United States.

TABLE 10.—*Value of IMPORTS of FOREST products, 1902-1904, by countries from which consigned.*

**PRINCIPAL FARM AND FOREST PRODUCTS IMPORTED.**

The most valuable group of farm products imported into the United States in 1903 and 1904 was sugar and molasses, worth in each of the two years about \$73,000,000. The next in value in 1904 was coffee, worth \$70,000,000; and the third was hides and skins, valued at \$52,000,000. From 1902 to 1904 imports of animal fibers increased \$11,000,000, of which gain \$4,000,000 was due to silk and \$7,000,000 to wool; the value of both silk and wool in 1904 was \$71,000,000. Fruits made a slight gain in 1904 over 1902. The marked fluctuations in the imports of hay appear in Table 11. The value in 1902, \$400,000, increased in 1903 to \$2,200,000, and declined in 1904 to \$900,000.

Of the forest products imported in 1904, the most valuable item was India rubber and the next was lumber. The imports of India rubber in 1904 were \$16,000,000 greater than in 1902. Table 11 gives the value of principal articles of farm and forest products imported during 1902-1904.

**SUGAR.**

The United States is a great cane-sugar consuming country. It is estimated by Willett & Gray<sup>a</sup> that during the calendar year 1904 the average consumption of sugar per capita in the United States exceeded 75 pounds. In no other country, except the United Kingdom, is so large an average quantity of sugar used. The great bulk of the sugar consumed in the United Kingdom is beet sugar, most of which is refined as well as produced on the Continent. In the United States the total amount of sugar consumed in 1904 is estimated at 2,767,162 long tons, of which nearly 90 per cent consisted of cane sugar, and only about 10 per cent of beet sugar.

During the fiscal year 1904 about 3,701,000,000 pounds of sugar were imported from strictly foreign sources. Of this, raw cane sugar alone comprised 3,682,000,000 pounds, raw beet sugar less than 3,000,000 pounds, and refined sugar of all kinds only 16,000,000 pounds. The imports of raw cane sugar amounted to only 2,686,000,000 pounds in 1902, reached 4,076,000,000 pounds in 1903, and fell off slightly in 1904. The other two classes of sugar show a remarkable decline since 1902, when 255,000,000 pounds of raw beet sugar and 91,000,000 pounds of refined sugar were received.

By far the largest foreign contributor to the sugar supply of this country is Cuba, which in 1904 furnished 2,820,000,000 pounds, over three-fourths of the total, while in 1903 it furnished 2,396,000,000 pounds, or 57 per cent of the total, and in 1902 only 984,000,000 pounds,

<sup>a</sup> Willett & Gray's Weekly Statistical Sugar Trade Journal, Jan. 5, 1905.

or 32 per cent of the total. Prior to 1897 Cuba uniformly held first rank in the shipment of sugar to the United States. The war greatly diminished that source of supply and, for four years, first Germany and then the Dutch East Indies held first place. But the recovery of the Cuban industry was rapid. In 1901 Cuba regained first place in our sugar imports, and in 1903 and 1904 the United States imported a larger quantity of sugar from Cuba than ever before.

Two events of great importance to the sugar trade took place during the fiscal year 1904. The abolition of bounties on the part of the countries that signed the Brussels Convention took effect on September 1, 1903; and the reciprocity treaty between the United States and Cuba, which was ratified March 31, 1903, was approved by Congress December 17, 1903. By the abolition of bounties, sugar imported into the United States from the principal beet-sugar countries of Europe, with the exception of Russia, escaped the countervailing duty imposed by the United States under the tariff act of 1897 on all articles receiving foreign bounties. Under the operation of the European bounties and the countervailing duties, cane sugar which received no bounty had been diverted to the United States and bounty-paid beet sugar to the United Kingdom. The Brussels Convention caused no immediate increase in the beet-sugar shipments to the United States, for the increase in the Cuban supply was sufficient to displace considerable quantities of other cane sugar and also of beet sugar. At the same time, in case the Cuban crop should temporarily decline, its place might now be taken by an increase in beet as well as cane sugar, except that the location of the principal seats of production of cane and of beet sugar favors the shipment of the former to the United States.

In addition to the imports of foreign sugar, in which the imports from the Philippine Islands are included, large quantities of sugar were furnished by Hawaii and Porto Rico, as well as by the domestic beet and cane industries. Hawaii alone in 1904 shipped 736,000,000 pounds of sugar to the United States, and Porto Rico 260,000,000 pounds, or together nearly a billion pounds, which are not included in the imports from foreign countries.

The cane product of Louisiana, although only about two-thirds that in either the preceding or the following year, furnished in 1903-04 about 482,000,000 pounds of sugar, and the domestic beet-sugar industry about 468,000,000 pounds, together not far below another billion pounds. Thus, notwithstanding the heavy sugar imports of 1904, the domestic and insular industry combined furnished more than one-third of the total supplies used in the United States.

## COFFEE.

The quantity of coffee imported into the United States in 1904 was exceeded in only one year—1902. The quantity received in 1904, including shipments from Hawaii and Porto Rico, amounted to 999,000,000 pounds, while the exports of both foreign and domestic coffee from the United States (including the noncontiguous possessions) amounted to 67,000,000 pounds.

The per capita consumption of coffee in the United States has increased greatly since 1869-1873, as is shown in Table 12:

TABLE 12.—*Per capita consumption of coffee in the United States, 1869-1904.<sup>a</sup>*

Years ending June 30—	Pounds.	Years ending June 30—	Pounds.
1869-1873 .....	6.91	1889-1893 .....	8.59
1874-1878 .....	6.83	1894-1898 .....	9.50
1879-1883 .....	8.34	1899-1903 .....	11.08
1884-1888 .....	8.69	1904 .....	11.79

<sup>a</sup> Not including noncontiguous possessions. In computing the net imports of coffee into the United States during 1901-1904, the Porto Rican and Hawaiian trade with foreign countries has been alike excluded from the total imports and total exports of coffee in the trade of the United States with foreign countries; and the shipments of coffee from these islands to the rest of the United States have been added to the imports of coffee from foreign countries. The effect of these changes is to class Porto Rico and Hawaii as foreign countries, so far as this computation goes, throughout the entire period covered by this discussion, from 1869 to 1904, inclusive.

The annual per capita consumption of coffee during 1899-1903 was 4.17 pounds more than during the five-year period 1869-1873, an increase of 60 per cent in thirty years. The chief source of supply of the coffee used in the United States is Brazil. Of the 995,000,000 pounds of coffee imported from foreign countries in 1904, 742,000,000 pounds came from Brazil; 137,000,000 pounds from other South American countries, chiefly Colombia and Venezuela; 77,000,000 pounds from Central America, Mexico, and the West Indies; 16,000,000 pounds from the Dutch East Indies (Java) and the Straits Settlements, and 3,000,000 pounds from Asiatic Turkey and Aden. In addition to this, 18,000,000 pounds were consigned to the United States from the ports of Europe. The leading ports of the United States into which foreign coffee was imported were New York, New Orleans, San Francisco, and Baltimore, receiving, respectively, in 1904, 800,000,000, 142,000,000, 28,000,000, and 19,000,000 pounds.

## FRUITS.

*Lemons.*—The lemons imported into the United States during 1904 came chiefly from Italy. The total imports amounted to 172,000,000 pounds, of which all but 2,000,000 pounds came from Italy. The quantity of lemons imported was not given in United States customs returns prior to 1900. Beginning with 1900, the imports in millions of pounds have been as follows: 160 in 1900; 149 in 1901; 164 in 1902; 152 in 1903, and 172 in 1904. During this period the importation of

highest value was in 1900, amounting to \$6,483 more than the value in 1904, although the quantity in 1904 was 12,000,000 pounds more than in 1900. The average annual import prices for the five years ending with 1904 were, respectively, 2.29, 2.37, 2.02, 2.03, and 2.13 cents per pound.

The market for lemons is especially good during the months of June and July, and producers try to ship as much of their fruit as possible in time to be sold during the hot months. In the fiscal year 1904 the importations in June and July amounted to 54,000,000 pounds, and in March, April, and May to 62,000,000 pounds, making a total of 116,000,000 pounds for the five months and leaving a balance of 56,000,000 pounds for the other seven months.

A considerable quantity of lemons is produced in California, and the shipments from California to the other parts of the United States are greatest during the months of May, June, and July. The lowest average of monthly shipments of lemons from California for a period of five fiscal years, ending with 1904, was for September, when the monthly average for the five years was 111 carloads, and the highest average was for July, 386 carloads.

TABLE 13.—*Quantity of lemons imported into the United States, quantity shipped from California, and average import price for the fiscal year 1904, by months.*

Year and month.	Imported.	Average import price per pound.	Quantity shipped from California.
	<i>Pounds.</i>	<i>Cents.</i>	<i>Carloads.</i>
1903:			
July .....	27,443,895	2.31	385
August .....	14,924,204	2.31	104
September .....	6,805,452	2.20	81
October .....	3,657,973	2.80	152
November .....	6,625,869	2.40	189
December .....	7,152,005	2.25	132
1904:			
January .....	6,650,468	2.10	148
February .....	9,439,217	2.02	212
March .....	20,399,923	1.96	279
April .....	19,573,994	1.95	214
May .....	22,480,807	1.96	339
June .....	26,819,414	2.08	440
Fiscal year, 1904.....	171,923,221	2.13	2,675

The 2,675 carloads in the above statement were equivalent to about 58,000,000 pounds.

The average monthly import prices during the fiscal year were lowest during March, April, and May, being 1.95 cents per pound in April and 1.96 cents per pound in March and May. The highest import price was in October, being 2.80 cents per pound. Table 13 shows for each month of the fiscal year 1904 the imports, the average import price, and the shipment of lemons from California.

The market prices in Sicily in June, 1904, ranged from \$1.93 to \$2.32 per box. The ocean freight rate from Sicily to New York on a box of lemons at that time was quoted at 30.4 cents. Thus the ocean

freight charge was from 13 to 16 per cent of the market price of the lemons in Sicily.

*Oranges.*—The estimated<sup>a</sup> crop of oranges in the United States for 1903-1904 was 25 times the quantity of oranges imported during the fiscal year 1904. The leading source of supply of imported oranges is the British West Indies, but quite a good many come from Spain, Mexico, and Italy. In 1904, 26,000,000 pounds were imported from the British West Indies, and 10,000,000 from all other countries. The value of the oranges imported was about one-seventh of the value of the lemons in this year. The average import price of oranges is considerably less than the average import price of lemons. In 1900 the average import price of oranges was 0.71 cent per pound less than lemons; in 1901, 0.95 cent per pound less; in 1902, 0.53; in 1903, 0.59; and in 1904, 0.67 cent. The average import price of oranges in 1904 was 1.46 cents per pound.

The monthly imports of oranges during the fiscal year ending June 30, 1904, were greatest in November, being 13,300,000 pounds, and smallest in March, 400,000 pounds. The average import price of oranges fluctuated considerably from month to month. The lowest price was in January, 1904, 1.05 cents per pound, and the highest average monthly import price for the fiscal year was 2.60 cents per pound, in May, 1904. Table 14 shows for each month of the fiscal year 1904 the imports of oranges, average import prices, and shipments from California.

TABLE 14.—*Quantity of oranges imported into the United States, quantity shipped from California, and average import price for the fiscal year 1904, by months.*

Year and month.	Imported.	Average import price per pound.	Quantity shipped from California.
1903:			
July .....	Pounds. 2,090,833	Cents. 2.11	Carloads. 905
August .....	894,794	2.47	393
September.....	3,337,656	1.53	204
October.....	7,393,085	1.40	188
November.....	13,288,673	1.32	102
December .....	3,729,744	1.28	1,060
1904:			
January .....	2,270,269	1.05	4,179
February .....	458,415	1.40	2,985
March .....	373,124	1.12	3,955
April .....	448,763	2.26	5,490
May .....	689,187	2.60	3,490
June .....	918,717	2.11	2,209
Fiscal year, 1904.....	35,893,260	1.46	<sup>a</sup> 25,160

<sup>a</sup>The 25,160 carloads were equivalent to about 540,000,000 pounds.

Shipments of oranges from California are made chiefly between the last of November and the first of July. From figures given by the Pacific Fruit World the total number of carloads of oranges

shipped from California during the year ending June 30, 1904, is found to be 25,160.

The American Grocer gives figures showing the production of oranges in California and Florida for a period of fifteen years. Prior to 1895-96 most of the oranges produced in the United States came from Florida, but in the year just mentioned the great freezes, which reduced the Florida production to 47,000 boxes from 6,000,000 boxes in 1894-95, resulted in California taking the lead in orange production in the United States. Not only Florida's misfortune but California's increased production has kept the latter State considerably ahead, and during the five crop years ending with 1902-1903 the average annual production in California was ten times that of Florida. By using the figures given in the American Grocer, and assuming the average weight of a box of oranges to be 72 pounds, the comparison of production and imports of oranges exhibited in Table 15 may be made.

TABLE 15.—*Production and imports of oranges, 1900-1904.*

Year ending June 30—	Production in California and Florida. <sup>a</sup>	Imports.

1902 .....	567,000,000	53,000,000
1903 .....	673,000,000	57,000,000
1904 .....	893,000,000	36,000,000

<sup>a</sup> Production is given for crop years 1899-1900, 1900-1901, etc.

During these five years there has been a decline of 33,000,000 pounds in imports and a gain of 450,000,000 pounds in home production. The freight rate on oranges and also on lemons from California to all points east of the Missouri River is the same. The fruit shipper has the privilege of diverting a shipment of oranges or lemons from one intended destination to another.

*Raisins.*—The two chief sources of supply of foreign raisins are Spain and Asiatic Turkey. Both these countries have sent less raisins in the last few years than they shipped ten or twenty years ago. From 1884 to 1888, inclusive, the average imports of raisins into the United States were 43,000,000 pounds a year. During the next five years the annual imports averaged 32,000,000 pounds. From 1894 to 1898 the average was reduced to 12,000,000, and since 1898 the average has been only 7,000,000, or about one-sixth of the annual average for 1884 to 1888. Meanwhile the shipments from California have increased to a large extent. Figures published by the California State Board of Trade show that from the period 1891-1893 to the period 1899-1903, the average annual shipments of raisins from California have increased from 58,000,000 to 81,000,000 pounds. The quantity of raisins shipped

from California is nearly twelve times the quantity imported into the United States. The Sultana raisins from Asia Minor and adjacent islands are made from a variety of seedless grape. The Malaga raisins come from Spain. In the New York market sometimes prices are quoted for as many as twelve different grades and kinds of foreign raisins and about the same number of grades and kinds of the domestic fruit.

#### LUMBER.

The forests of Canada supplied \$38,000,000 worth of lumber to the United States during the three years ending June 30, 1904. Most of this lumber, as is well known, came from the regions bordering on the Great Lakes, and reached the United States through the ports of entry on these lakes. The imports of lumber from Canada in 1904 were valued at \$11,700,000, or \$2,100,000 less than in 1903. The value of all other unmanufactured wood consigned from Canada to the United States during 1904 was \$2,000,000, and wood pulp amounted to \$1,800,000. The customs districts in which most of the lumber imports from Canada were entered in 1904, and the value of the imports in each district, were as follows: Huron, Mich., \$1,600,000; Champlain, N. Y., \$1,600,000; Oswegatchie, N. Y., \$1,300,000; Buffalo Creek, N. Y., \$1,100,000, and the Vermont customs district, \$1,000,000. The total value of lumber imported by way of the northern border and lake ports in 1904 amounted to \$11,000,000.

Most of the value of imported lumber consists of boards, deals, planks, and other sawed lumber, the quantity of which in 1904 was 589,000,000 board feet.

The imports of shingles in 1904 were from Canada, and were valued at \$1,600,000. These shingles were imported chiefly through Memphremagog, Niagara, Bangor, and the customs district of Vermont. Twenty-three million shingles were received through Puget Sound customs district.

Nearly one-half of the logs and round timber imported into the United States in 1904 came by way of Puget Sound.

#### DETAILED STATEMENT OF IMPORTS.

In Table 16 have been tabulated in detail the statistics of imports of farm and forest products for 1902, 1903, and 1904, by countries and by articles.
